

Affective ERP observation

trial-averaged
response per condition
(negative / neutral / pleasant)

Neuromorphic transformation

fixed LIF spiking reservoir
+ BSC₆ event-driven spike code

Four operationally distinct evidence streams

E spike embedding

D reservoir dynamics

T tPLV graph topology

C structure–function
coupling κ

Characterization

Mechanism ablation +
negative controls

Perturbation robustness
(temporal / amplitude /
channel / graph)

Closed-loop evidence
accumulation (Dirichlet
belief, EFE controller;
offline, recorded
observations)
